

## Bead Remover

**Bead Trimmer II**

### R&L Manufacturing Inc.' Bead Trimmer II

#### Operational Theory

The Bead Trimmer II system has an adjustable cutter that is designed to operate in a range of pipe sizes. The Bead Trimmer II head is powered by a manual Tee-handle system.

It is most productive to remove the fusion bead during the cooling stage of the Fusion Process.

The use of the tool is very simple and straightforward. It requires no additional tool for complete assembly, operation, and disassembly.

The torque tube assembly can be made up in length to match the job at hand, by adding more torque tube. This system has been used to retrieve internal bead at a distance of over 250'.

*We also offer other line and type of Bead Remover. Call for detail.*
