

## Electrofusion Processing Unit

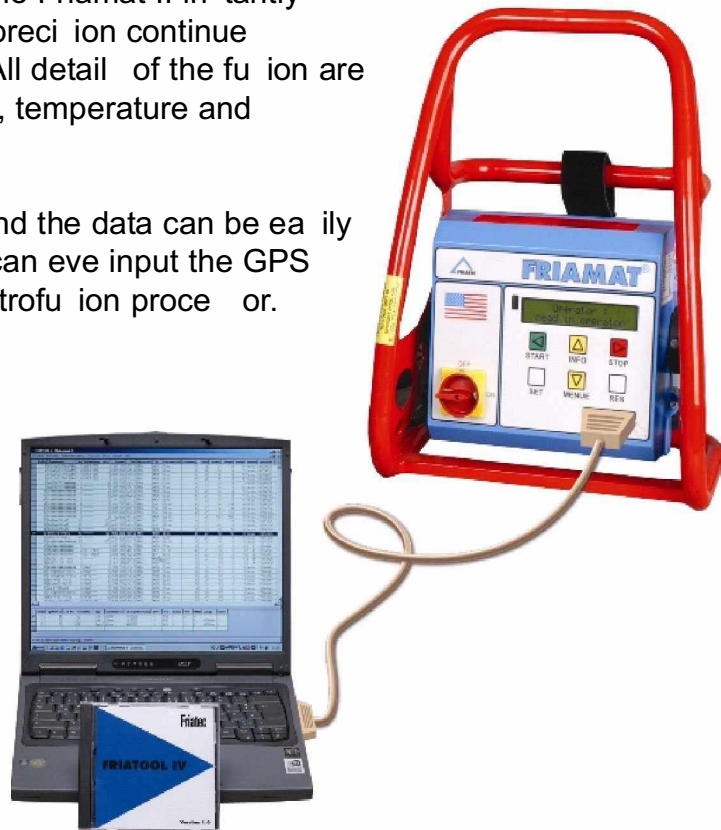

**IPEX**  
Committed to Excellence

### Friamat II Universal Electrofusion Processor

The Friamat II is the industry's leading electrofusion processor. With a simple scan the Friamat II instantly reads every type of fitting. The precision continues throughout the fusion process. All details of the fusion are recorded, including the operator, temperature and duration.

It stores all fusion information and the data can be easily transferred to a computer. You can even input the GPS location of the joint into the electrofusion processor.

### Scraper Tool

Friatec scraper tools are designed to assist the installer in producing a quality electrofusion joint. With Friatec Scraper Tools a quality electrofusion joint can be achieved every time.
