

TracStar® No. 28

- Track mounted, self-contained, self-propelled, all-terrain hydraulic fusion machine
- Jaw set/carriage can be easily removed for in-ditch use
- On-board generator for powering the heater and other device
- Fit in a standard long box truck bed for easy transport

PitBull® No. 28

- Compact for fusion above or in the trench
- Simple jaw set/carriage for greater portability

McElroy No. 28 Machine will butt fuse pipe size from 2" IPS - 8" DIPS (63mm - 225mm). All models incorporate the interchangeable No.28 carriage, which can easily be removed for in-ditch use, and feature McElroy' patented Centerline Guidance System. The CU (Combination Unit) adds double fusion capability of up to an 8" DIPS (200mm) branch on any size main. Two fixed and movable clamping jaws result in precision pipe alignment for higher quality fusion joints. The machines are DataLogger® compatible and can fabricate segmented elbow with optional metered insert.

- Wheeled chassis for easy maneuvering on the job site

The CU (Combination Unit) adds double fusion capability of up to an 8" DIPS (200mm) branch on any size main.
