McElroy PolyPorter™ wa created from the mind of a pipeline contractor. It i an innovative workhor e that tackle the job of handling pipe in the field. The PolyPorter combine the mechanical advantage of a dolly with the functionality of a pipe tand to create one of the mo t u eful pipeline tool . U ing thi machine, one per on can ea ily load a length of pipe without train. The pipe can then lide ea ily through the roller equipped hook arm into the fu ion machine. The jack enable the operator to raise and lower the PolyPorter to level the pipe in uneven terrain.
