

### **Clamp Saddle ASTM/NPT Line**

The clamp or tapping saddle are made of Polypropylene and can be used for all type of pipe including PVC or metal pipe. The product range is from 3/4" to 12" with NPT female outlet from 1/2" to 4".

#### **Line 7154**

This line of clamp saddle come with the unique gasket which is a combination of the traditional O-ring with a flat gasket. The advantage of this gasket are:

- The large contact surface allow you to overcome problem with cracked and damaged pipe.
- In case of water-hammer there is less risk that the gasket will jump out of the groove.
- Thank to the higher resistance there is less risk that the saddle turn on the pipe.

The line is equipped with stainless steel reinforcement ring for maximum safety. The product are individually packed and labeled in plastic bag up to 4".

Pressure rating is up to 150 psi

The range of possible application include :

- Water supply line
- Irrigation for sport facilities, agriculture and commercial building
- Industrial application (industrial washing, mining, fish farming, etc.)

#### **Line 7150**

This line of clamp saddle come with the O-ring and without the reinforcement ring. It is the perfect solution for the price of sensitive column market such as irrigation for agriculture and gardening.

The saddle are individually packed and labeled up to 4".
