

### **Anodeless Service line risers**

The first anodeless riser is still the best... Perfection's anodeless service line risers. These risers provide an excellent meter connection that requires no cathodic protection. Our service line risers are available with Permasert coupling or fusion outlets and in single seal or double seal configurations. All Perfection risers meet or exceed the

requirements of ASTM D-2513 category 1, ANSI B 1.20, ANSI B 31.8, US DOT Part 192, NFPA-58 and CSA B137.4.

- Outlet sizes from 1/2" IPS to 12" IPS
- Inlet sizes from 1/2" CTS to 12" IPS
- Available with Permasert couplings or fusion connection on pigtail
- Single seal or double seal models
- Available with NEW Perfectacote protective coating for extended service life
- Manufactured to utility specifications (custom configurations available)
- Flexible and galvanized castings available
- Metric sizes available
- New PELT risers (Perfection Extended Life Technology) resist effects of chemical, atmospheric, ultraviolet and physical attack, and deliver excellent above ground corrosion resistance.

### **Transition fittings**

Perfection steel-to-polyethylene transition fittings are ideal for gas and oil applications. The fittings provide a connection with a pull-out strength greater than the PE tubing to which it's connected. Our transition fittings ensure a positive seal with added "O" ring protection and are both laboratory and field tested for regulatory compliance.

- Threaded and weld styles
- Sizes from 1/2" IPS x 1/2" CTS to 12" IPS x 12" IPS
- Meets or exceeds requirements of ASTM D-2513 category 1, ANSI B 1.20, ANSI B31.8, US DOT Part 192, NFPA-58 and CSA B137.4
